上世纪90年代初，几位资深音乐教育家、演奏家和制造业专业人士共同创办了广州市罗曼士乐器制造有限公司，旨在为音乐爱好者提供高质量的专业乐器用弦和配件。从一开始，罗曼士的产品就已融入了创办者对音乐的深刻理解和制造方面的丰富经验。

经过多年磨砺，罗曼士不断发展壮大，技术日臻成熟，已拥有雄厚的研发实力。我们拥有经验丰富的乐器制造师、富有想象力的机械工程师、充满创意和激情的产品设计师、琴弦专家、声学专家、演奏家等及众多国内外专业人士的技术交流。他们从各个方面不断为罗曼士的产品提升品质和注入创意。

自2003年起，本公司持续研究并制造出多种数控自动缠弦机和自动拧珠机，同时引进各种国外先进设备，目前生产设备自动化程度已超过90%。在更新生产设备的同时，我们也不断探索和革新材料制造与处理工艺，多项新材料的制造和运用已达到世界先进水平。因此，我们获得了多项琴弦制造技术的国家专利和名牌产品称号。

经过多年发展，我们现有厂房面积近3万平方米，超过1000台专业生产设备，并配备具有专业技能的熟练工人。我们采用与国际接轨的质量和生产管理体系，严格监控生产的整个流程，对从原材料到成品以及包装均执行严格而精细的筛选流程。罗曼士推崇一丝不苟、精益求精的理念，确保产品的产量和质量都满足客户要求。目前，我们的产品销往世界50多个国家和地区，深受海内外用户欢迎。

本公司旗下拥有Alice®(爱丽丝)、Winner®(赢家)、Romeo®(罗美欧)等主要品牌，产品超过两千种，包括以吉他和提琴弦为代表的西乐弦、民族乐器弦以及各种乐器配件。罗曼士琴弦音色优美，音调准确，手感舒适，经久耐用，乐器配件设计新颖，用材优良。我们对产品进行精细分类，让音乐爱好者根据自己的演奏习惯和乐曲风格选择合适的产品。

罗曼士奉行“勇于创新、超越时代”的理念，不断为音乐爱好者提供高质量的产品，推动音乐事业的发展。

In the early 1990s, a group of music educators, performers, and manufacturing professionals co-founded Guangzhou Romance Musical Instruments Co., Ltd. Their goal was to provide music enthusiasts with high-quality musical instrument strings and accessories. Since its inception, Romance's production has been guided by a deep understanding of music and extensive manufacturing experience.

Through years of exploring, Romance has acquired advanced technology and R&D capability. We have a team of experienced luthiers, visionary engineers, passionate designers, string specialists, acoustics experts and instrument performers. They have kept improving romantic products in quality and creativity.

Since 2003, Romance has committed itself to research and making of computer - controlled automatic winding machines and ball-end attaching machines. Meanwhile, we keep adopting advanced machinery from abroad. The automation rate of our equipment is now over 90%. Romance not only keeps upgrading machinery for production but also exploring new materials. Being advanced in producing and using of new materials, we have been awarded national patents.

With years of development, our production plant now covers about 30,000 square meters, with more than 1,000 machines run by experienced technicians. We have adopted a quality and production management system of international standards, to supervise the complete procedure of production, from raw material processing to end-product packing. Romance has been meticulous in making sure output and quality are up to customers' expectations. We now supply customers from more than 50 countries and regions around the world.

Alice®, Winner® and Romeo® are the primary brands under Romance. We offer over 2000 different products, including guitar strings, bowed instrument strings, traditional Chinese instrument strings, and musical instrument accessories. Romance strings are known for their melodious tones, precise tuning, comfortable feel, and durability. Our accessories are recognized for their stylish design and high-quality materials. With our products carefully categorized, musicians can easily select items that suit their playing styles and music genres.

Romance remains committed to the ethos of "Be brave to innovate, beyond the times", continuously providing music enthusiasts with top-notch products and contributing to the advancement of the music industry.

先进的琴弦技术

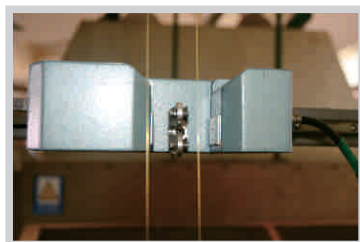

Advanced String Technology

各种琴弦缠弦材料及先进的防锈涂层工艺

我司自1999年创立之初，就着重于材料的研究与应用，为满足音乐爱好者对音色、手感的需要而开发出多个系列的铜材和铜合金琴弦。同时，解决琴弦生锈问题也是我司的重点研究方向。作为最早研发琴弦防锈技术的先锋，我们经过不断试验，于2005年发明了各种颜色的防锈标准防锈涂层，曾获得国家专利。但我们追求进步的脚步不曾停止，目前此工艺又升级为高分子化合物标准防锈涂层。为确保标准防锈涂层厚度均匀，我们以纳米级检测仪全程监控生产过程。爱丽丝琴弦因此不但防锈能力更强，而且手感更加舒适，外观更亮丽。

Advanced Winding Materials And Coating Technology

Since the start in 1999, we've been focusing on research and application of materials. To meet music lovers' demand of tone and playability, we've developed many series of strings. Solving the problem of rusty strings is also our focused issues. As the pioneer of anti-rust string technology, we endeavored and invented a series of colorful anti-rust coating, for this achievement we were granted a national patent. But we never stop on the way of improving, recently the coating has been upgraded to polymeric compound. To ensure even thickness though the windings, we adopted nanometer measurers to monitor the whole production process. Therefore, Alice® strings not only have stronger anti-rust ability, but also smoother playing feel and brighter appearance.

改性材料及乐器琴弦

我司发明了一种改性尼龙材料。该材料抗拉强度高，蠕变度低，吸湿性低，以此制成的琴弦高音明亮，低音饱满扎实，较快达到调音稳定，不易松弛。此发明获得了国家发明专利证书（专利号ZL201610679117.8）。

Modified Material And Musical Instrument String

We invented a type of modified nylon material. This material features: high tensile strength, low rate of creep and little humid absorption. Strings made of this material are bright in treble, full and forceful in bass; they have shorter settle-in time and good tuning stability. (Patent No. ZL201610679117.8)

全新工艺-纳米抛光覆膜琴弦 New Technology - Strings with Nano Polished Coating

纳米抛光覆膜是一种全新的琴弦制作工艺。其最主要的特点是使得琴弦表面长久保持光亮。

原料首先通过抛光使表面形成一层紧密坚固的保护膜，再加以高聚物、氟碳等材料进行高温或低温循环纳米级覆膜，其厚度仅为标准防锈涂层的1/10左右。以此工艺制造的琴弦声音特别清脆明亮，非常适合追求音质的吉他发烧友使用。

Nano-polished coating is a brand-new string manufacturing process. Its main feature is to keep the surface of strings bright for a long time. The raw materials are first polished to form a tight and strong protective film on the surface, and then high or low temperature Nano-coating cycles are carried out to apply high-polymer, fluorocarbon or other materials to them. Thickness of coating is only about 1/10 of anti-rust coatings. Strings made by this process sound particularly crisp and bright, which is very suitable for guitar enthusiasts who pursue tone quality.

六角钢芯缠绕更均衡，韧性更好
Hexagonal core guarantees more balanced winding and better resilience

纳米抛光后，形成一层薄而坚固的保护膜
An ultra-thin protective film is formed after Nano-grade polishing

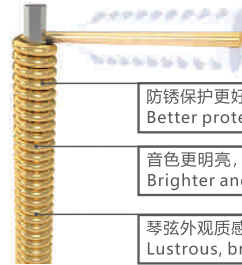

选用高聚物或氟碳等原料，再进行高温或低温循环纳米级覆膜，琴弦发音更明亮通透，具有防锈效果好且手感更舒适的特点
Materials such as high-polymer, fluorocarbon are applied with high or low temperature coating cycles. Strings made with this technology features brighter and more transparent tone, better rust resistance and smoother feel

全新工艺-多层纳米级覆膜琴弦 New Technology - Strings with Multi-layer Nano Coating

原料经过镀银抛光后，以高聚物或氟碳等材料进行10-20层高温或低温循环纳米级覆膜，其厚度是标准防锈涂层的1/5-1/10。采用此工艺制造的琴弦外观质感丰富，色彩梦幻，更有发音明亮、浑厚、温暖，手感舒适等特点，是演奏家的理想之选。

Raw materials are silver-plated and polished, then 10-20 layers of Nano-grade coatings are applied by high or low temperature cycles with materials such as high polymer or fluorocarbon; the thickness is 1/5-1/10 of general coatings. Manufactured by this process, strings feature lustrous textures, dreamy colors, bright, full, warm tones, and smooth feel. It is an ideal choice for performers.

标准防锈涂层琴弦 Strings with Anti-rust Coating

早期常用于钢琴弦上的“通用防锈涂层”工艺，主要过程为以聚合物为原料进行2-4层高温厚涂。采用此工艺制造的吉他弦外观亮丽，手感舒适，防锈能力强，但声音不够通透明亮，达不到原声吉他弦的效果。为了解决此难题，我司从2000年起不断投入大量资金反复研究，对传统涂层工艺做精心改良，经过不懈努力，终于在2006年取得成功。新工艺主要以新型高分子聚合物等材料进行6-10层高温或低温循环薄涂。以此工艺制造的琴弦不但手感出色、外观亮丽、防锈能力强，而且更重要的是音色有了较大提升，我们统称“标准防锈涂层琴弦”。(执行标准: Q/RMSYQ 1-2015)

In the early days, the regular anti-rust coating technology was commonly used on piano strings, the main process is 2-4 layers of high temperature thick coating with polymer as raw material. The guitar strings manufactured by this process are bright in appearance, comfortable in hand and strong in rust resistance, but the sound is not transparent or bright enough to achieve the effect of uncoated strings. In order to solve this problem, our company has continuously invested a lot in repeated research since 2000, and made elaborate improvements to the traditional coating process. After unremitting efforts, we finally succeeded in 2006. The new process mainly uses 6-10 layers of high-temperature or low-temperature cyclic thin coating with materials such as new high-molecular polymers. The strings made by this process not only have excellent feel, bright appearance, strong anti-rust ability, but also more importantly, the sound has been greatly improved. We collectively refer to them as "standard anti-rust coated strings". (Execution standard: Q/RMSYQ 1-2015)

资格证书与荣誉证书 Qualifications & Certificates

经过多年的努力和快速发展，我们已经实现了产品品牌化和生产自动化。我们的质量管理体系已通过ISO9001:2015认证，琴弦产品获得了“采用国际标准产品标识证书”，出口产品符合REACH和RoHS标准。我们已获得多项专利证书。我们的品牌产品“爱丽丝牌琴弦”荣获广东省名牌产品称号，Alice®(爱丽丝)获得广东省著名商标称号。

With years of dedication, we have experienced rapid expansion and established our renowned brand - Alice®. Our quality management has been certified with the ISO9001:2015 certificate, and our strings have received the "Adopting International Standard Product Marking Certificate." Our exported products adhere to REACH and RoHS standards. Our brand's products, "Alice® Strings," have been honored with the title "Brand Product of Guangdong," while the Alice® brand itself has been recognized as the "Famous Brand of Guangdong." Additionally, we hold numerous national patents. And we are holding many national patents.

罗曼士自创立以来，在引进世界领先水平的自动化设备的同时，更是不断自主研发和创新，以提高产品质量与产量。现时我司大部分琴弦都使用自动缠弦机制造。自动缠弦机通过电子感应器和控制器对缠弦过程进行检测控制，缠弦的张力、速度、角度、幅度均可灵活调节和稳定控制。因此我们的琴弦具有质量稳定、张力均匀、发音灵敏、延音持久、音调稳定、手感舒适等特点。

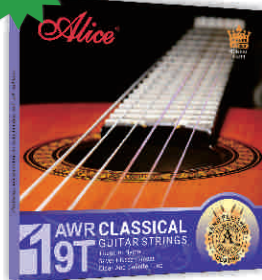

罗曼士的迅速发展立足于严格的质量管理和持续的产品研发。我司于2008年投入大量资金成立了产品质量检测中心。2018年，我们购入多台先进仪器，成立了新的研发基地和检测中心。该中心配备了多台先进的检测仪器，主要用于原材料、成品检测和产品研发。

Since its inception, Romance has been focused on enhancing quality and productivity. We not only import advanced automatic machines but also conduct ongoing research and innovation to develop our own. Currently, the majority of our strings are manufactured using automatic winding machines. These machines regulate the winding process with electronic devices. Parameters such as tension, speed, angle, and length are all adjustable and precisely controlled. As a result, our strings exhibit well-balanced tension, superior responsiveness, good tenuto, and a comfortable feel.

Romance's rapid growth is built on rigorous quality management and ongoing product research and development. In 2008, we made the decision to invest and set up an inspection and testing center. In 2018, after acquiring several high-end inspection devices, we established a new Research and Development Base.

爱丽丝专业民乐弦系列

Traditional Chinese Musical Instrument Strings

我司琴弦研制组与优秀专家、专业团体合作，共同对声学、律学进行深入研究，将西方造弦理论与中国民族乐器特性相结合，研制出爱丽丝(Alice®)民乐琴弦。

我们不但引进国内外材料，也不断研制自己的新型材料以运用到琴弦制造上。比如高档琴弦所采用的高碳钢芯，经过我们的特殊工艺处理后达到高抗拉强度和高顺直度，以这种材料制造的琴弦振动更加均匀，泛音更加丰富。又如我们的防锈保护涂层工艺，既能使琴弦抗氧化寿命延长，又能让琴弦展现出多种绚丽色彩。

我们的民乐琴弦分为练习用弦和演奏用弦两个档次。每个档次的材料、工艺、音色都有所不同，以满足广大音乐爱好者所需。除了传统琴弦，我们还推出了金色、银色和彩色的琴弦，炫彩的视觉效果为音乐演奏者带来丰富的灵感和独特的体验，深受市场欢迎。

自民乐琴弦推出以来，我们收到许多音乐专家、学者的宝贵意见。我们将以此为根据不断研究和创新，把我们的民族乐器琴弦品质不断提高。

技术特点： 爱丽丝(Alice®)民乐演奏用弦，是以精湛的传统工艺与现代精密机械自动化设备制作而成的经典品牌琴弦。

声音特点： 琴弦具有张力平均，音色圆润透明等特点，音质达到音乐会用弦的国际标准。

外观设计： 先进的表面处理技术使得整套琴弦视觉独特，展现出金、银等耀眼色彩。

To analyse and fit characteristics of traditional Chinese musical instruments, our string R&D group worked closely with experts on musical acoustics and temperament. With extensive research and thorough tests, we applied western string-making theories on manufacturing of Chinese instrument strings. "Alice" traditional Chinese Musical Instrument strings were born in this background.

We not only use premium materials sourced globally, but also new materials developed by ourselves. For instance, we use specially-treated high-carbon steel on high-end strings. Strings made of this type of steel feature an even vibration and richer harmonics. Our anti-rust coating gives longer lifespan and vivid colors to our strings.

To accommodate music lovers' various preference, we provide three tiers of strings: standard strings, concert strings and advanced concert strings. In addition to strings in traditional appearance, we supply golden, silvery and colorful strings to give performers special inspiration and experience.

Since the first introduction of traditional Chinese instrument strings, we received precious reviews and comments from experts and scholars, based on which, we keep researching and improving, with the goal of achieving top quality.

Production: "Alice" traditional Chinese musical instrument strings are dedicated to concert performance. Premium materials sourced globally, sophisticated conventional techniques and modern precise automatic machinery infuse these classic strings with a distinct quality.

Feature: Evenly distributed tension; mellow and transparent tone; up to an international standard of concert performance.

Appearance: Our advanced surface processing technology gives the whole set of strings a brilliant appearance of gold, silver and other vivid colors.

我们将精密传动结构与出色的外观设计结合，打造出爱丽丝(Alice)镀金三位准。

底板采用流线型设计，以压铸工艺制造，经特殊工艺着色以及仿真金电镀处理，外观精致亮丽。尺寸精准的底板，与精密加工的蜗轮蜗杆配合使得传动顺滑流畅。

底板底纹：端庄大方的牡丹花；古典浪漫的玫瑰花；神秘威严的东方龙。

旋钮：仿玛瑙；乌木。

Alice advanced gold-plated machine heads are a combination of precise mechanics and exquisite design. Plates are in stream-line style, they are die casted, then treated with a special coloring process, and finally plated with gold. Precisely sized plates fitted with arcuately made worm shafts and worm wheels rendered a smooth and comfortable operation.

Plate pattern: elegant peonies; classical roses; mysterious dragons.

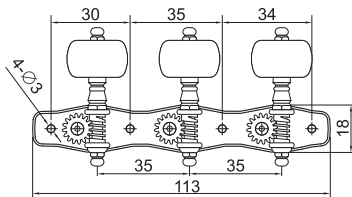

Button: agate imitating resin; ebony

品线系列

Fret Wires Series

品线的制造是一个复杂的过程，它由线材拉丝-压制成型-切断-除油-烤制-退火-抛光-再次热处理-清洗-烘干等30多道工序组成。

为满足市场需求，我司投入大量资源，从多个方面改进工艺，优化生产流程，提升产能和质量。材质方面，我们通过显微数字硬度测量法，盐雾法，硫化法等检测方法严格控制原料和成品的质量。工艺处理方面，我们投资引进真空退火流水线，并研发出电磁振动抛光机等先进设备。产能方面，我们通过机械化改造，使目前自动化程度达到90%以上。现时我们的常规品线有黄铜系列，白铜系列和不锈钢系列，超过50个规格，覆盖了曼陀铃，班卓，尤克里里，吉他，贝司等多种乐器。并可根据客户要求规格定制。

2022年，我司品线全新升级为高温退火纳米抛光工艺，产品更加光洁明亮。并引进全新制造设备，实现边缘倒角或圆角，帮助制琴客户节省打磨时间。

Production of fret wires is complex, composed of more than 30 procedures: drawing, molding, cutting, oil-removing, high-temperature treating, annealing, polishing, reheating, cleaning, drying, etc.

To accommodate a growing and diversifying market, we invested heavily to improve material treatment, optimize production process and upgrade quality and throughput. Inspecting methods such as digital microhardness testing, salt-erosion and sulfuration are employed to control quality of raw material and finished products.

We not only introduced a vacuum annealing line, but also developed our own electromagnetic driven polishers. Mechanization has kept improving, currently our automation rate is over 90%.

Our regular fret wires are made of brass, cupronickel and stainless steel, they come in more than 50 sizes and specifications, covering many types of instruments: mandolin, banjo, ukulele, guitar, bass etc. Customized production is available upon order.

In 2022, our production line was upgraded to high-temperature annealing and nano-polishing processes to give the fret a smoother, brighter appearance. With the introduction of new manufacturing equipment for edge chamfering or rounding, instrument manufacturer customers have found that lead times have been reduced with our products.

贝多芬

The musical score is written for guitar in C major, 3/8 time. It consists of 24 measures. The notation includes standard musical symbols (notes, rests, bar lines) along with guitar-specific instructions such as fret numbers (e.g., 12, 11, 12, 7, 10, 6), fingerings (e.g., m, i, m, i, m, i), and dynamics (p, dim.). The score is organized into six systems, each with a treble and bass staff. The key signature is one sharp (F#), and the time signature is 3/8. The piece is marked 'C.5' for measures 1-4, 5-8, 9-12, 13-16, 17-20, and 21-24. The final measure is marked 'p' (piano).
